INTERNATIONAL DEALERS' CONFERENCE

Dealers from four continents travelled to Wittlich to our International Dealers' Conference from 26 – 29 April. New products were presented and well-proven products intensively trained in extensive product training courses. It was possible to test drive all the implements in practice. Our partner compa-

nies', planting machines, spraying and processing foliage could also be experienced live. The VineScout in particular aroused enthusiasm: "When the driver has once lost his inhibition and lets go of the steering wheel, he very quickly gets used to the considerably easier work", our dealer from Canada

remarked. All participants confirmed that this year the demand for soil tillage implements grew enormously worldwide. We can confirm this trend and had to considerably increase our production capacities in spring in order to be able to do justice to the demand.

WHAT YOU SEE IS WHAT YOU GET

Our videos have already been seen over 194,000 times. At our channel you can choose between different playlists. For example CLEMENS viticulture or CLEMENS Partner (WAGNER planting machi-

nes, LIPCO spraying technic). Our latest video clip is about the automatic steering system CLEMENS VineScout mounted on a harvester and on a vineyard track-laying tractor. Make use of the opportu-

nity as well to see our products at work on the YouTube video channel:

■ VISIT TO AFRICA

Also this year, the CLEMENS Company has presented its products for foreign trade on 72 m² within the context of a joint German booth in Cape Town (South Africa).

The Fair was from 02 to 04 August 2011. In advance of it we had visited numerous wine estates in South Africa.

■ ALL ABOUT CLEMENS

In this context, our company's responsibility or competence encompasses the following fields:

- Planning, development and construction of machines for vineyards and fruit-growing, as well as for row crops
- Joint development and construction of special machines together with customers in a whole variety of industries, from A for automotive to W for wine-making
- Cut blanks and production of individual parts, including assembly of complete machine modules
- Processing of stainless steel sheet, preferably for the manufacturing of tanks
- Advice and trade in machinery and

plant for bottling beverages

- Installation and commissioning of own and third-party products by our own service engineers

Due to this large range, we are in a position to adapt to market conditions, even in economically difficult times, and to organize our capacities in an active and flexible manner. We look forward to finding, designing and maintaining solutions together with you to meet your specific requirements. What distinguishes our company from others is our striving towards an enduring partnership in which we can take over our duties and responsibilities independently. Put us to the test!

■ EXPANSION OF THE MACHINERY PLANT

At the beginning of the year, we expanded our machinery plant once again. A new ribbon saw was purchased allowing us to cut round material up to a diameter of 300 mm. Only a modern machinery plant offers our customers short delivery time through independence from suppliers and other manufacturers.

■ ORCHARD SUPPLIERS

Orchard Suppliers, based in Worcester, Western Cape, South Africa is a top-tier agricultural company with 20 employees providing agricultural equipment and chemicals internationally. The company was founded in 1922 and is committed to providing innovative and dependable solutions to farmers and businesses. Their focus is to provide well proven products to improve quality and productivity, and ultimately to increase profitability for their customers.
